TANKMAKERS

TANKMAKERS GUARANTEE

40 YEARS OF TESTING

40 years of tested design and water storage solutions the proven TANKMAKERS range provide the right answers for all your Domestic, Agriculture, Molasses and heavy duty poly tank requirements.

UV-stabilised to withstand the harsh Australian sun, the rotary moulded tough food grade polyethylene plastic exceeds the Australian standard AS/NZS4766:2006 for upright polyethylene tanks.

EXCEPTIONALLY STRONG

A TANKMAKERS tank won't crack, fade or rust and their one-piece construction makes them exceptionally strong and easy to clean.

EASILY MANEUVERED

Even the largest TANKMAKERS poly tank can be easily maneuvered before installation. Once connected they will give years of trusted water storage.

FROM YOUR LOCAL DEALER

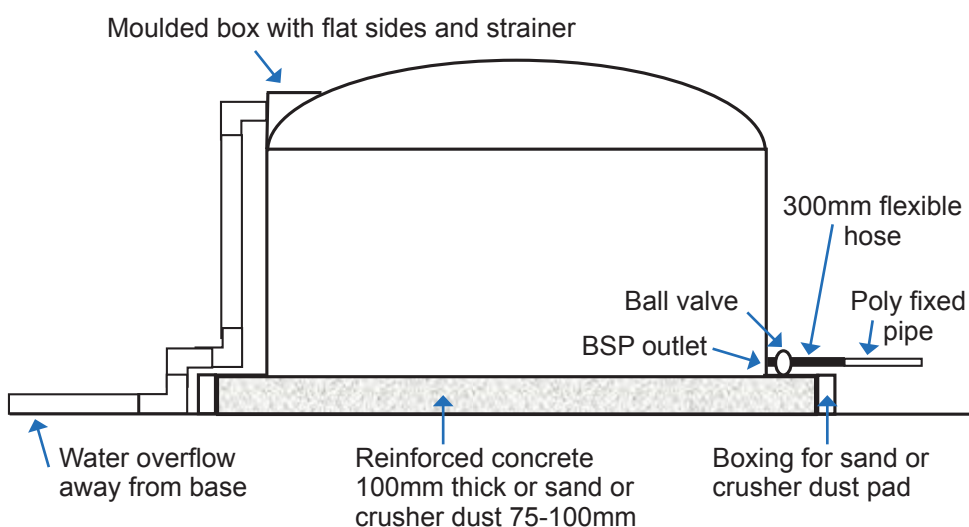

Available from authorised TANKMAKERS dealers, your new tank will be delivered direct to you or ready for collection from your nearest dealer. TANKMAKERS are more than Australian owned, we support local businesses and their customers, doing it right from our factory to you.

All TANKMAKERS tanks carry a no-nonsense manufacturer's repair or replacement ten year warranty.

Visit tankmakers.com.au for more details.

Site Preparation & Installation

Tank Installation

- The tank site must be flat and level, the area well compacted and free from any rocks, stones and sharp objects
- Ensure that the prepared site is at least 600mm larger in Diameter than the tank
- A 75mm (3") base of compacted crusher dust may be used as a tank pad. A reinforced concrete slab is also acceptable and must be greater than the Diameter of the tank
- If a material other than concrete is used, a retaining wall or surround must be provided to prevent erosion
- The overflow must be piped well clear of the tank to avoid undermining of the tank base
- Ensure that a flexible hose of at least 300mm (12") is installed after the outlet valve to absorb any shocks or movement

How Do I Order A Tankmakers Tank?

Easy! Just visit our website tankmakers.com.au
To find your nearest dealer or phone 1800 720 362 today!

WHAT DO I NEED TO KNOW ABOUT **TANKMAKERS**?

What are Tankmakers tanks made from?

An Extremely tough but flexible type of plastic called Polyethylene, which has been used in the industry for liquid storage for many years.

Will my water be tainted?

No. Many companies use polyethylene for packaging of milk, soft drinks etc.

Do I need a tank stand?

No, just a firm foundation with no sharp or protruding objects. The overflow should be piped away to prevent erosion.

How strong are they?

TANKMAKERS tanks are moulded in a one-piece construction so there are no joints or weak points where leaks could occur.

Is a Tankmakers tank safe for drinking water?

Absolutely safe! Polyethylene is food grade approved and is the same material that is used for water pipes.

Will algae grow inside my tank?

No. Too much light causes Algae growth. Specially designed tank grade Polyethylene prevents light entering the tank.

How long will my tank last?

Over 20 years. All TANKMAKERS tanks are UV stabilised to protect them from the sun and ensure a long lifetime.

PLEASE NOTE: The truck delivering your tank could be up to 19m long, 3.5m wide and 4.6m high.

EACH TANK HAS BEEN **RIGOROUSLY TESTED**

DELIVERY REQUIREMENTS

Please ensure that you notify **TANKMAKERS** when confirming delivery if there is insufficient space for an oversize truck-trailer combination to turn around, or gain access to the tank site, or if there are any obstacles that the driver will need to consider.

Max truck-trailer combination dimensions: 19m (L) x 3.5m (W) x 4.6m (H). Obstacles may include low power lines, overhanging trees, gates, inaccessible roads, washouts or uneven ground. If access is not available or possible, the driver will unload the tank at the closest and safest place possible to the delivery site.
